

Forensic Psychology

[View Online](#)

In this module we will explore areas of current interest and debate in the psychology of criminality, and in the relationship between psychology and the criminal justice system. We will consider the roles that psychologists play in understanding, detecting and treating criminal behaviour, and we will discuss the issues, methods, findings and implications of research in areas such as the development of antisocial behaviour, the assessment and rehabilitation of offenders, crime statistics, psychopathy, sex offenders, terrorism, and eyewitness testimony.
